

Gautam Kumar

gkt2work@gmail.com | Address: BTM Stage 2, Bengaluru, Karnataka | +91 9934455873

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in building scalable web applications and SaaS platforms using modern JavaScript frameworks and backend technologies. Strong foundation in full-stack development, API design, databases, and cloud-ready systems, with growing exposure to AI-assisted platforms and data-driven products. Adaptable, fast learner, and experienced in collaborative, agile environments.

SKILLS

Technical Skills

- JavaScript • TypeScript
- Python • SQL
- React.js • Angular
- Node.js • Express.js
- FastAPI • REST APIs
- MongoDB • WebSockets
- AWS (ECS, S3 – exposure)
- Docker (Basics) • CI/CD

Tools & Concepts

- Git • GitHub
- Jira • Postman
- Authentication & RBAC
- Agile Development
- Data Structures (Basics)

EDUCATION

ASANSOL ENGINEERING COLLEGE

B.Tech in Electronics & Communication Engineering
Asansol, India
2014 – 2018
CGPA: 7.70 / 10.0

AWARDS

National Level Workshop – **Quadcopter Drone**

VLSI Certification – National Institute of Electronics & IT, Calicut

EXPERIENCE

FOREIGNADMITS | SOFTWARE DEVELOPMENT ENGINEER (SDE-1)

February 2025 – Present | Bengaluru, India

- Designed and implemented **AI-driven platform features**, including LLM-powered chatbot flows to handle study-abroad queries.
 - Owned end-to-end conversational workflow design, including prompt structuring, intent handling, and backend orchestration.
 - Integrated chatbot responses with internal admissions data to improve accuracy and reduce manual counselor intervention.
- Built **AI-assisted document processing workflows** for structured extraction of student and academic data (applications, IDs, forms).
 - Integrated OCR pipelines with backend validation, normalization, and data consistency checks.
 - Enabled reliable ingestion of high-volume documents across multiple intake formats.
- Implemented **intelligent search and recommendation workflows** inspired by RAG-based systems.
 - Enabled semantic course discovery and smarter shortlisting aligned with student profiles and preferences.
 - Improved relevance and usability of search features for counselors and internal teams.
- Developed and maintained **scalable backend services** using Node.js, Express.js, and MongoDB.
 - Designed REST APIs to support real-time queries and high-volume admissions data.
 - Ensured system scalability and reliability for AI-powered platform features.
- Integrated **role-based access control (RBAC)** and secure API authentication mechanisms.
 - Enabled controlled access for counselors, operations teams, and internal stakeholders.
 - Ensured secure usage of AI-enabled tools across roles.
- Optimized **API performance, pagination, filtering, and database queries** to ensure low-latency responses.
 - Improved performance of AI-powered dashboards and search functionalities.
- Delivered **AI-first features to production** using agile development practices.
 - Participated in sprint planning, code reviews, and Git-based release workflows.
 - Ensured stable and reliable deployment of AI-enabled platform enhancements.

PROFESSIONAL TRAINING

FULL STACK WEB DEVELOPMENT | CODING NINJAS

2024 – 2025

- Frontend development using HTML, CSS, JavaScript, and React.
- Backend development using Node.js and Express.js.
- Database design and integration with MongoDB and SQL.
- Built REST APIs, authentication flows, and followed Git/GitHub-based collaborative workflows.
