

GAUTAM KUMAR

Software Engineer · Full Stack Developer

Bengaluru, Karnataka | +91 99344 55873 | gkt2work@gmail.com
gkt2work.vercel.app | github.com/gk2work | linkedin.com/in/gkt2work

SUMMARY

Software Engineer building scalable web apps and SaaS platforms with modern JavaScript and backend technologies. Strong in full-stack development, API design, databases, and cloud-ready systems, with deep, practical exposure to AI-driven products — LLM chatbots, RAG, OCR pipelines, and voice agents.

SKILLS

Languages: JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, Angular, Tailwind CSS

Backend: Node.js, Express.js, NestJS, FastAPI, REST APIs, WebSockets, GraphQL

Databases: MongoDB, PostgreSQL, Redis, Qdrant, FAISS

AI / ML: OpenAI GPT-4o, Llama 3.1 (LoRA), RAG, embeddings, OCR pipelines

Cloud / DevOps: AWS (ECS, S3), Docker, CI/CD, Vercel

Tools: Git, GitHub, Jira, Postman, RBAC & Auth, Agile

EDUCATION

B.Tech, Electronics & Communication Engineering

Asansol Engineering College, Asansol
2014 – 2018 · CGPA: 7.70 / 10.0

EXPERIENCE

Full Stack Developer — ViaCerta

Technology & Product Development · May 2026 – Present · Bengaluru, India

- Develop and maintain company websites, web applications, and mobile applications across the product suite.
- Own backend architecture — APIs, databases, and server-side operations — ensuring scalability, performance, and security.
- Manage deployment, integrations, bug fixes, and technical maintenance while collaborating with product, marketing, and management teams.
- Research and adopt modern technologies and development practices to support business growth and future product development.

Software Development Engineer (SDE-1) — ForeignAdmits

Feb 2025 – Mar 2025 · Bengaluru, India

- Designed and shipped AI-driven features, including LLM-powered chatbot flows for study-abroad queries — owning prompt structuring, intent handling, and backend orchestration with internal admissions data.
- Built AI-assisted document processing with OCR pipelines plus backend validation and normalization, enabling reliable high-volume ingestion across multiple intake formats.
- Implemented RAG-inspired search and recommendation workflows for semantic course discovery and smarter shortlisting.
- Developed scalable Node.js / Express / MongoDB services and REST APIs; added RBAC and secure API authentication; optimized queries, pagination, and filtering for low-latency responses.

Full Stack Web Development — Coding Ninjas

Intensive Program · Jun 2023 – Feb 2025

- Built full-stack applications with React, Node.js, and Express.js; designed and integrated MongoDB and SQL databases.
- Implemented REST APIs and authentication flows following Git/GitHub-based collaborative workflows.
